

2010 International Fuel Ethanol Workshop & Expo

ADF invites you to visit our booth at the upcoming [Fuel Ethanol Workshop & Expo](#) in St. Louis from June 14-17, 2010. Alex Fishman, Matt Williamson, Mario Ancona and Rob McKeown will be on hand to discuss their capabilities and expertise in the BioFuels Industry. We look forward to connecting with you at **Booth # 619**.

In order to make your project successful you need to partner with an experienced engineering company. ADF Engineering offers extensive knowledge and a high level of Process and Facility engineering experience in BioFuels, from research to manufacturing. Every year ADF handles over 250 projects in the Fuel, Feed, Food and BioScience industries, that bring value to our clients.

ADF Is an Industry expert in the BioFuels Industry

ADF Engineering has completed various projects in the BioFuels Industry based on the direction and needs of their clients. Our expertise in the Food, Feed and Fuels industry allows ADF to be versatile and adapt to the individual needs of a specific project.

Below is a short list of the projects we recently completed:

- Created Scope Definition Package for Grass-Roots Aquaculture-Ethanol Plant
- Developed layout design for Caribbean-based ethanol dehydration facility
- Completed Scope Definition for Canola Oil BioDiesel plant
- Designed algae oil pond temperature control process
- Developed thin stillage clarification technology
- Completed debottlenecking and expansion of major corn-to-ethanol plant
