ADF Engineering, Inc.  
228 Byers Road, Suite 202  
Miamisburg, OH 45342

Dear Alex,

Over the past five years, Cargill Dayton has come to rely on and appreciate ADF Engineering. Their comprehensive competencies in engineering disciplines have provided exceptional value to Cargill. We rely on ADF for feasibility studies, structural design, process design, construction management and general engineering support. ADF's assistance from the initial design stage thru project management has assured the smooth start-up and on time completion of our jobs. They recognize our 24 hr, seven-day operation and have been responsive to our problems on nights and weekends.

ADF Engineering's commitment to quality service, rapid response and cost effective work has made them the Engineering firm of choice for our plant. We strongly recommend ADF as a highly effective and value-driven engineering services provider who will be a responsible partner of choice.

A handwritten signature in cursive script that reads "David Bone".
