

ADF Engineering

PROBLEM SOLVED

**Engineering Solutions
for the
BioFuel Industry**

ADF offers comprehensive Engineering Solutions

ADF Engineering is a full service engineering and consulting firm serving the Food, Feed and Fuels industries. ADF Engineering has accumulated an impressive client list including Fortune 500™ companies by offering all disciplines of engineering expertise including process, civil/structural and controls.

The technical experts at ADF have extensive field and design experience. ADF manages all phases of a project from conceptual design to startup services. Collaboration between your team and ADF ensures the success of your project.

Engineering Solutions for BioFuel Plants

- Process & Facility Engineering
- Throughput & Troubleshooting
- Energy Resource Optimization
- Process Simulation & Pinch Analysis
- Thin Stillage Clarification
- Wet & Dry Milling
- Multi-Discipline Engineering
- Expansion & Additions
- Environmental & Process Safety

Engineering Solutions for High Value Products

- Scope Definition & Cost Estimates
- 3D Layouts & Walkthroughs
- Site Integration
- Feed Product Enhancement
- Alternative Co-Products

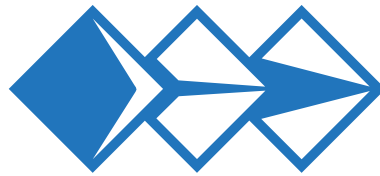

Engineering Solutions for Emerging Technologies:

- Advanced BioFuels, BioChemicals & BioCrude
- Modular Integration of New Technologies
- Flexible Feed Stock Storage & Handling
- Process Scale-Up
- High Value Co-Products
- Food Safety Design

ADF Engineering has extensive experience in the Food, Feed & Fuel Industries in the following areas:

- Animal Feeds & Aquaculture
- Wheat, Barley & Sorghum
- Corn Wet & Dry Milling
- Cellulosic & Algae
- Nutraceuticals
- Citrus Ethanol
- Corn Ethanol
- Sweeteners
- Fatty Acids
