

## [ Industrial Site Selection ]

Investing in a new industrial facility carries economic risk, but the right partner can help you navigate the complicated landscape of location options, regulations, and planning. As a process and facility engineering company, ADF Engineering is uniquely positioned to help you manage your next project. Our project management experience across manufacturing and processing industries coupled with our multi-disciplinary engineering teams makes us a one-stop shop for your next facility. From site selection and feasibility studies to concept design and commissioning – let ADF be your guide.
